Introduction

Ellerston Capital Limited ("Ellerston"), including its subsidiary Morphic Asset Management ("Morphic"), believes that incorporating Environmental, Social & Governance ("ESG") considerations into the investment process can lead to more informed and holistic investment decision-making and better investment outcomes for our investors.

Ellerston's Responsible Investment Policy outlines our approach to practicing responsible investing which comprises of four key components:

- 1. ESG Integration** – the consideration of ESG in our investment process, research, analysis, ongoing monitoring and divestment;
- 2. Portfolio Screening** – negative and positive;
- 3. Stewardship** – engagement with companies in our investible universe and those included in our portfolios (and all relevant stakeholders), participation in industry working groups and undertaking proxy voting appropriately; and
- 4. Transparency** – disclosure of portfolio holdings on a bi-annual basis and annual publication of our Stewardship Report.

Ellerston recognises that good and effective ESG stewardship of our client's investments is important.

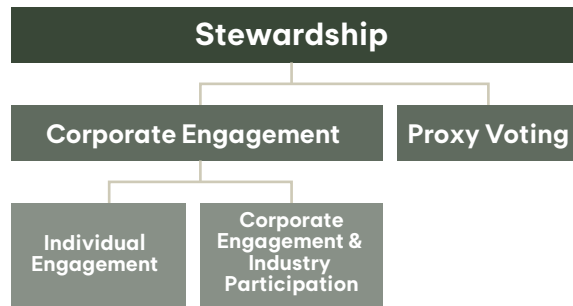

A fundamental aspect of stewardship is to vote our clients' proxies, or advise on the exercising of proxy votes, when the investments in their portfolios are entitled to do so. Our intention is to always vote in the best interests of the client's investments in the portfolios that we manage on their behalf.

Every financial year Ellerston will publish a record of its proxy voting for the preceding period. In instances where a vote was cast against the recommendation of the Management, we will provide an explanation.

Active Stewardship

Being a responsible investor requires us to be good stewards of our client's capital. We do this through individual and collaborative engagement with portfolio companies and proxy voting.

Corporate engagement has long been a particularly strong pillar of all of our investment processes. We view engagement as one of the most powerful mechanisms to influence change in listed equities and individual or collaborative engagements can have a positive impact on companies.

Individual engagement is where Ellerston engages directly with portfolio companies. It enables discussion of relevant matters with management, ensures good corporate governance practices, and may also seek to influence corporate decision making at a strategic level. We engage with companies on a range of issues including, but not limited to, modern slavery, climate change, diversity and inclusion, greenhouse gas (GHG) emissions¹, board governance and remuneration. Our analysis of key issues like modern slavery and climate-related risks better informs our corporate engagement priorities.

Collaborative engagement is where Ellerston may engage with companies, including those within and outside our portfolio, alongside other investors and industry experts. Collaborative engagement allows investors to pool resources together, which saves investors from duplicating efforts. It also allows investors to have a uniform and targeted approach which can also be less onerous on companies' resources and more effective to enact change. Investors engage on several ESG issues, including climate change and diversity and inclusion.

Industry Group engagement is important for Ellerston, where we engage with the ESG industry, contributing to the evolving development of ESG and gaining additional insights from various forums and working groups. We engage with third parties such as finance and ESG professionals, clients, peers, NGOs, government bodies and policy makers on a range of ESG topics.

Proxy Voting is where Ellerston votes on behalf of our clients at the Annual General Meetings (AGMs) or special meetings of companies that we have invested in. We intend to vote their proxy in the best interests of their investments in the portfolios that we manage on their behalf. Portfolio managers (PMs) are responsible for their own fund's proxy voting, with our operations team facilitating and notifying PMs and the ESG team of upcoming votes. The ESG team monitor the voting proposals and supports the PMs in sustainability-related voting decisions where required. Ellerston currently discloses our proxy voting records and the majority of our listed equity holdings on a semi-annual basis, which exceeds local market standards.

¹ GHG emissions and carbon emissions are often used interchangeably, carbon dioxide equivalent is often used as a standard measure of GHG emissions (i.e. GHG emissions are converted into carbon emissions for ease of comparing).

Individual Engagement with Companies

Throughout the year Ellerston have engaged with numerous companies across a range of industries on ESG issues.

A summary of the engagements is provided below at the GICS sector level.

Sector	Example of topics discussed	
Consumer Discretionary	Corporate governance Remuneration Cybersecurity	Supply chain management Board accountability ESG rating systems Sustainability strategy
Communication Services	Corporate governance	Capital allocation
Real Estate	ESG reporting Gender diversity	
Energy	ESG materiality	Renewable energy use Water management
Financials	Board structure Remuneration	
Industrials	ESG reporting Workplace health and safety	Carbon emissions Diversity & Inclusion
Information Technology	GHG emissions Responsible AI Employee welfare	Energy usage Gender diversity Ethical social media practices

Collaborative Engagement and Industry Participation

The following is a list of our memberships and working groups.

Memberships

Principles of Responsible Investment (PRI)

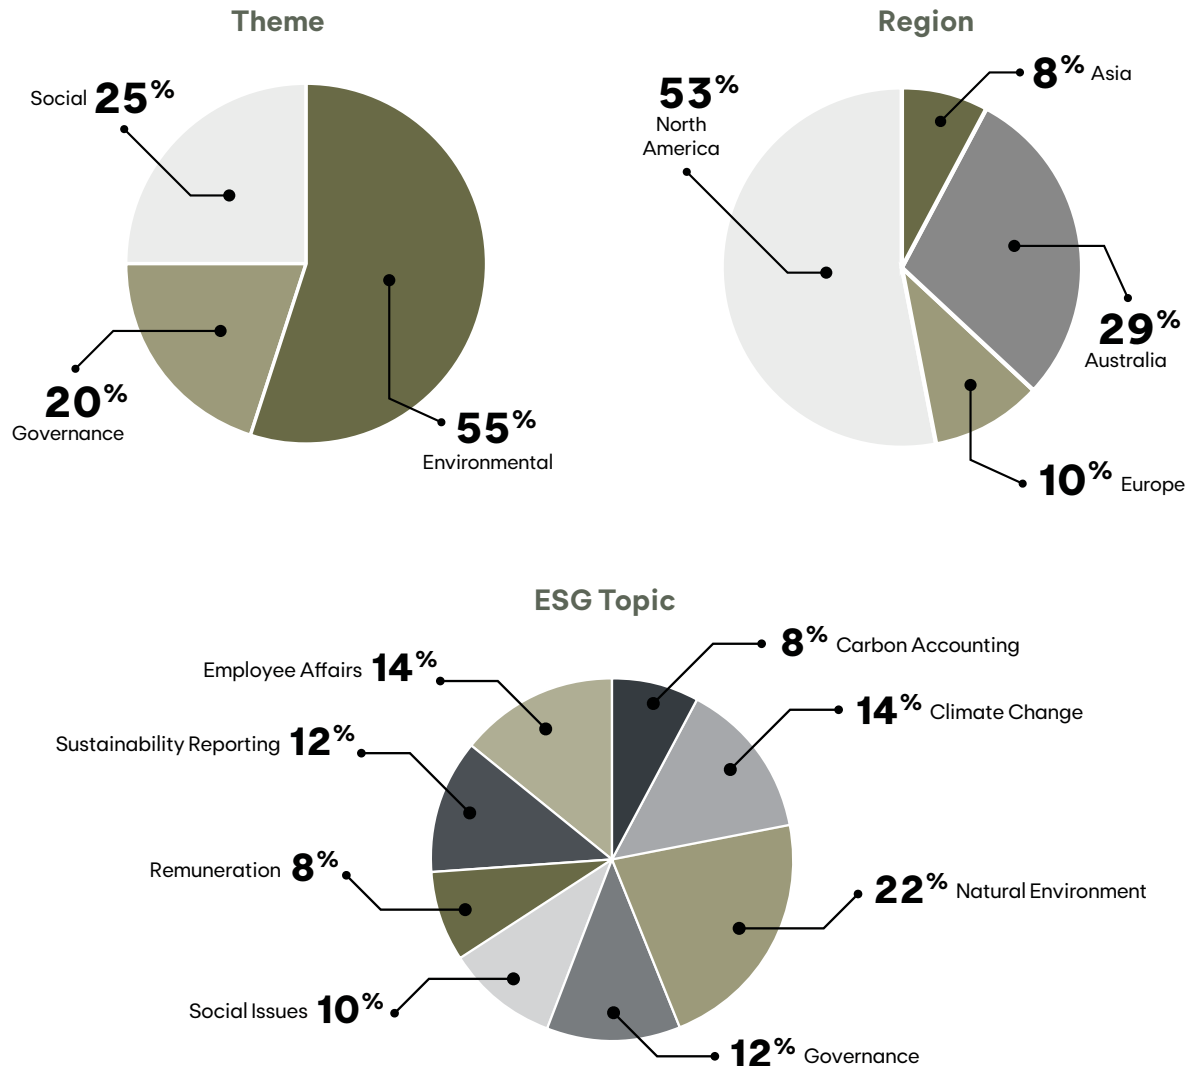

Responsible Investment Association Australasia (RIAA)

Engagement Summary

Ellerston Capital undertook approximately 88 engagements for FY23-24. Over 70 of our investee companies were engaged on a variety of issues, with environmental issues such as carbon accounting, climate change and environmental impact being the focal points. With increased regulatory and public focus on climate reporting, we predict this will continue next year.

The following is a summary of all engagements by Ellerston from 1 July 2023 to 30 June 2024. This is broken down by theme, country and topic.

Case Studies

The following are examples of 4 companies that Ellerston engaged with throughout FY 2023-2024

Case Study

Bega Cheese Ltd (Bega)

ASX: BGA, Australian Large Cap

Industry (GICS sector and industry)

Consumer Staples, Food

ESG theme

ESG Ratings

Engagement

Bega is a diversified food and non-alcoholic drinks company with a range of manufacturing sites across Australia. Bega operates two business segments - consumer products sold via convenience channels (i.e. groceries) and its bulk segment, which consists of ingredients sold to food manufactures.

Some investors use third-party ESG rating providers to receive a supplementary assessment of a company's approach and risk management of ESG factors, alongside their own perspectives. There is a range of methodologies used by third party ESG rating providers which often vary across the providers, leading to different ratings for the same company and uncertainty for company management teams.

The Ellerston ESG team engaged with Bega senior management to explain the third party ESG rating provider market, the differences between the providers and examples of their application in investment decision making processes. Bega were rated by a selection of providers, were aware that the number of third party ESG rating providers in the market were increasing and wanted to understand where to prioritise their efforts to improve their ratings.

Result

The Bega team were educated about the different third party ESG rating providers and informed on how some investment teams may utilise the providers' outputs. Bega does not currently disclose or reference any third party ESG rating provider on its websites or annual reports. We recommended disclosing the providers and any material changes to its overall score over time. We will review Bega's future reporting to understand if the company has implemented our recommendations.

Case Study

IPD Group Ltd (IPD)

ASX: IPG, Australian Micro Cap

Industry (GICS sector and industry)

Capital Goods

ESG theme:

ESG Reporting & Disclosure

Engagement:

IPD is an Australian owned company specialising in power distribution, monitoring and servicing. IPD supply a range of electrical infrastructure systems, electrical products and accessories across Australia. The company's solar photovoltaic (PV) and particularly their electrical vehicle (EV) charging business units have grown in the last 12 months due to the company's creation of their Gemtek business. As a result, we wanted to review increasing operational ESG-related disclosures from their prior baseline. The company has previously detailed distinct environmental, social and governance initiatives, however the increase in ESG-related metrics and targets would enhance public reporting.

The engagement involved the Ellerston investment and ESG teams seeking further clarity on the company's progress in increasing disclosure in their semi-annual and annual reports, particularly as the growth of their EV business unit was seen as a strategic priority.

Result:

Ellerston was pleased to learn that IPD have established internal targets in various ESG-related metrics such as energy reduction, diversity and inclusion and safety (Lost Time Injury Frequency Rate) but do not publicly disclose the results. IPD were encouraged to publicly disclose these data points and the Ellerston team will continue to monitor their progress.

Case Study

VEEM Ltd (VEEM)

ASX: VEE, Australian Micro Cap

Industry (GICS sector and industry)

Capital Goods

ESG theme

ESG Reporting & Energy Management

Engagement

VEEM is an Australian listed company that specialises in marine propulsion and stabilisation systems. VEEM hold the global license for a new propeller that they believe is 10-20 times more energy efficient than comparable products. As the company have established a product that has a sustainability benefit, it would assist the company to increase its broader ESG maturity via additional data collection (such as operational carbon calculation) and increased public disclosures.

VEEM's current ESG-related disclosures are limited to its Governance activities. The Ellerston investment and ESG team engaged with management and sought clarification for the plans to implement additional ESG-related public reporting.

Result

VEEM was receptive to the issues raised and have commenced the capture of relevant data and company ESG progress to date in preparation for future public reporting. However, this has not been realised in the last round of public disclosures. VEEM continues to be a company that we will revisit and monitor with regards to their improvement of ESG disclosures.

Case Study

Option Care Health (Option)

NDAQ: OPCH, US Mid-Small Cap

Industry (GICS sub-industry and sector):

Healthcare Services, Health Care

ESG Theme:

Governance - Cybersecurity

Engagement

In early 2024, Option faced a significant challenge when a cybersecurity incident occurred at Change Healthcare, a critical vendor. The breach, which took place on February 21, 2024, prompted Option to swiftly implement alternative processes to maintain their operations and ensure patient care continuity. Although the company reported no compromise of its own systems, the incident notably disrupted their claims processing, leaving over half of the claims unprocessed.

Recognising the gravity of the situation, we engaged with the CFO of Option in March 2024 to gain a deeper understanding of the impact and the company's response. Through this engagement, we learned that Option demonstrated resilience from a cash flow perspective, managing to maintain operations without significant revenue loss. However, the timing of cash flow was affected, with expected shifts from the first quarter to the second quarter.

Result

The resilience shown by Option during the cybersecurity incident highlighted the company's robust operational capabilities. Despite the disruption, the impact on revenue was minimal, and the company's proactive measures ensured that operations continued smoothly. The operational impact is expected to last until the third quarter of 2024.

Given that Change Healthcare holds a substantial geographic market share of approximately 75% to 80%, the cyberattack affected almost all providers in the industry. Consequently, Option is unlikely to lose market share due to this incident. This situation underscores the importance of strong cybersecurity measures and the ability to respond effectively to vendor-related risks.

Through our engagement, it's clear that Option remains committed to maintaining operational integrity and safeguarding against future cybersecurity threats. The company's prompt and effective response to the incident not only minimized disruptions but also positioned them to gain market share, serving as a testament to their governance and resilience.

Proxy Voting

Proxy Voting Guidelines

As a responsible investor, we believe that ESG issues may impact the value of entities in which we invest. We are committed to incorporating ESG standards into our voting criteria to act in the long-term interests of our clients as per our guidelines below:

1. Act in the long-term interests of shareholders.
2. Protect shareholders' rights.
3. Ensure independent, diverse and efficient board structure.
4. Align incentive structures with long-term interests of stakeholders.
5. Disclose accurate, adequate, and timely information.
6. Ensure good environmental and social performance.

Voting decisions are based on the following considerations:

For: The proposed resolution reflects good practice and is in the stakeholders' long-term interest

Abstain: The proposal raises issues of concern for shareholders or lacks sufficient information

Against: The proposal is not acceptable and is not in the shareholders' long-term interest

In the event that we vote on a resolution in opposition to the management recommendation, we will attempt to engage with the Company ahead of the shareholder meeting in order to communicate our voting intention and explain our rationale for opposing the management recommendation.

Proxy Voting Process

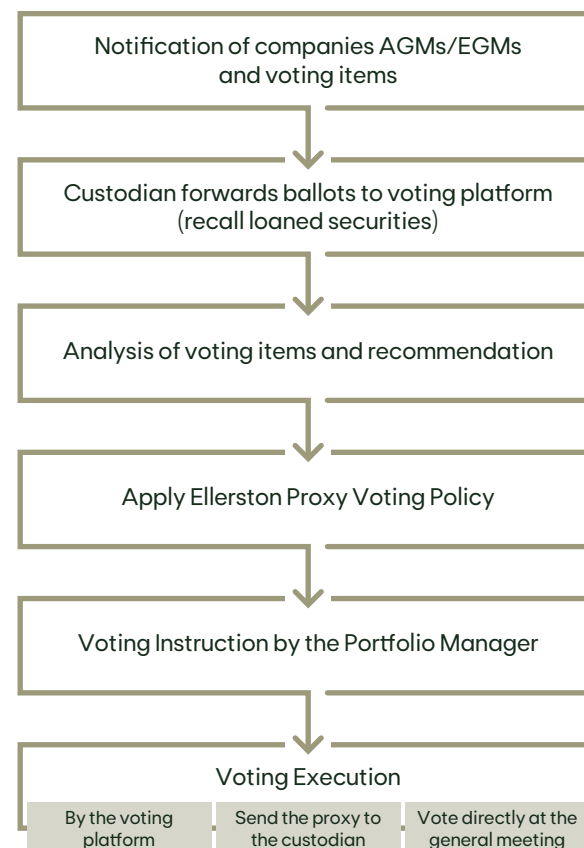

Ellerston receives notices of shareholder meetings from its portfolio companies through its custodians or the companies themselves. Our analysts and portfolio managers will form a view on the items to be voted upon with the voting decisions being made on a case by-case basis based on the guidelines above.

Where Ellerston has discretion under its agreement with the client, as a general rule, Ellerston will not seek direction from the client prior to it exercising a vote or initiating relevant company engagement to address individual issues. However, Ellerston may from time-to-time consult with clients on particular issues. Clients may require our proxy voting to follow the recommendations of third party Proxy Advisors, or may direct Ellerston to vote on specific issues, and we will implement that direction to the extent we are able to do so.

It may be the case that we attend shareholder meetings and vote for our clients proxies in person.

As part of enhancing our voting process, we are now more closely monitoring sustainability-related proposals, for example, proposals relating to biodiversity, climate change, GHG emissions, modern slavery, human rights and diversity and inclusion.

The schematic below outlines the key steps of the proxy voting process, from the notification of voting agendas in the context of Annual General Meetings (AGM) or Extraordinary General Meetings (EGM), through to actual voting execution:

Disclosure and Transparency

Consistent with our commitment and responsibilities related to PRI and, where relevant, product certification bodies such as RIAA, our policy is to provide full transparency on our proxy voting on an annual basis.

After the close of each financial year, Ellerston will publish on its website a summary of its proxy voting activities for the previous financial year providing the details below (when available):

- The name of the entity and the country in which it is listed
- The meeting type and meeting date
- Whether the matter or matters voted on were proposed by the issuer, its management or another person or company
- A brief identification or description of the matter or matters (proposals) to be voted on at the meeting
- The Management recommendation
- How Ellerston voted, or advised, on the matter or matters
- Whether Ellerston voted against management on the matter or matters
- In the case of a decision to vote against management, a record reflecting the reason for that decision is compiled

Other Issues

Conflicts of Interest

All Ellerston employees are under an obligation to be aware of the potential for conflicts of interest with respect to proxy votes on behalf of clients. We acknowledge that conflicts of interest do arise and where a conflict of interest is considered material, Ellerston will abstain from voting until the conflict is managed or resolved. Ellerston maintains a Conflicts of Interest Policy which provides the framework and rules which address this issue.

Shorting

Where client and product mandates allow, Ellerston may from time-to-time sell short securities of companies where it believes this will generate good investment returns for our clients. Ellerston cannot vote on securities that are short sold; the buyer is entitled to vote instead.

Securities Lending

The holdings of Ellerston's funds may be loaned out by our custodians to generate securities lending revenues and facilitate market liquidity. In the event that holdings are loaned out; in order to vote at forthcoming shareholder meetings, we will attempt to have the shares recalled.

Summary of Proxy Voting

Throughout FY2023-2024 we voted on more than 280 meetings that consisted of more than 2,000 proposals. This was for over 250 companies across more than 20 countries.

The following demonstrates the geographies that we have voted in:

Countries Voted

From 1 July 2023 to 30 June 2024, we voted on 96.98% of votable proposals. Where we voted, 7.19% of our votes were against management recommendations. For each of these proposals where we voted against management, an explanation is provided in the table below (Full Disclosure of Proxy Voting Record).

Full Disclosure of Proxy Voting Records

The following is a table of all votes cast by Ellerston from 1 July 2023 to 30 June 2024. Explanatory notes are provided where Ellerston has voted against management.

Company Name	Country	Meeting Type	Meeting Date	Proponent	Resolution	Management Recommendation	Vote Instruction	Vote Against Management

*Voting Notes

The following provides Ellerston Capital's explanations where we have voted against management. Please note, all other resolutions where Ellerston Capital voted against Management (not listed below), we voted in line with ISS recommendations.

Company: Genex Power Limited, AGM 20/11/2023

Proposal type: Management

Proposal: Elect Ben Guo as Director

Vote: Against

Explanation: The board is currently not majority independent. Particularly, there are 2 previous employees on the board. Therefore, we recommend voting against Ben Guo (former CFO). This will take the board to 50% independent. This will allow a new independent director to be added to the board over the next 6 months and take the board to 2/3 independent. We recommend voting For the re-election of Kenichi Seshimo as a shareholder representative as J-Power have been supportive and we would like them to remain on the board.

Company: Genex Power Limited, AGM 20/11/2023

Proposal type: Management

Proposal: Approve the Issuance of Up to 10 Percent of the Company's Issued Capital

Vote: Against

Explanation: We want to be able to see the metrics behind new projects before approving equity to fund.

Company: GUD Holdings Limited, AGM 26/10/2023

Proposal type: Management

Proposal: Approve Conditional Spill Resolution

Vote: For

Explanation: Upon review of documentation.

Company: Hansen Technologies Limited, AGM 23/11/2023

Proposal type: Management

Proposal: Approve the Increase in Remuneration of Non-Executive Directors

Vote: Against

Explanation: Current pay is sufficient and there is adequate headroom in the existing pay limit if pay increases are to be put through. There is no need for another board member when 7 are already on the board.
