

Ellerston Fixed Income Target Return Fund – Class A Units

Monthly Report as at 31 October 2025

APIR Code: ECL4489AU

Fixed Income Target Return strategy with strong focus on generating returns throughout the market cycle.

Targets a low correlation to growth assets (and credit returns) through the cycle, but aims to increase protection during times of market weakness.

Dynamic risk allocation framework balances trade-offs between alpha sources and defensiveness.

Performance Summary

Performance	1 Month	3 Months	6 Months	1 Year	Since Inception (p.a.) ^^
Net ^	0.1%	0.3%	0.5%	2.9%	2.3%
Benchmark*	0.2%	0.7%	1.5%	3.2%	3.3%
Alpha **	-0.1%	-0.4%	-1.0%	-0.3%	-1.0%

^ The net return figure is calculated after fees & expenses, assuming all distributions are reinvested. Past performance is not a reliable indication of future performance.

* Benchmark: RBA 6m TD Index. ^^ Inception date 30 August 2024. ** Alpha is return generated from Net returns comparatively to the Benchmark.

COMMENTARY

PORTFOLIO CHANGES

The EFIT base portfolio is primarily composed of Australian major bank FRNs maturing in 2–5 years, rated AA-. Adjustments were made in October, with the portfolio's current yield at approximately 4.37%.

Our quantitative fixed income strategies were adjusted to emphasise those best positioned for the current environment. The risk premia portfolio continues to actively manage duration, anticipate rate moves through the easing cycle, navigate yield curve shifts, and hedge against abrupt central bank policy changes via long volatility positions.

FORWARD POLICY OUTLOOK

The Federal Reserve delivered a second consecutive 25 bp cut at its 29–30 October meeting and said it will halt QT on 1 December, with reinvestments skewed to T-bills. Chair Powell's press conference tamped down confidence in a follow-up move in December; market odds softened as he stressed the Committee is "not pre-committed." Our base case remains one more 25 bp cut in December, then a slower, alternate-meeting pace of easing through 2026 toward neutral. While the front end is anchored by the easing bias, longer-dated yields may stay sticky as the term premium is supported by persistent deficit and issuance concerns, even as passive balance-sheet runoff fades. Near-term policy sensitivity sits with softer hiring and cooling consumer momentum versus still-elevated services inflation.

AUSTRALIA

The RBA is now likely on hold until February after a downside surprise in employment was followed by an upside surprise in Q3 inflation. The trimmed-mean rose to ~3.0% y/y (1.0% q/q), broad-based across goods and services, complicating the near-term easing case. Markets that briefly priced aggressive near-term cuts have retraced; an easing this year now looks unlikely absent a significant external shock. The Board will wait for confirmation in wages, unit-labour costs and productivity before reconsidering; the risk case is a further rise in unemployment alongside climbing core inflation, which would keep policy restrictive for longer.

PORTFOLIO PROFILE

We expect central banks to continue easing into 2026, with the pace of cuts dependent on the inflationary impact of tariffs.

The investment team anticipates US bond yields will fall sharply if hard data confirms the weakening trend seen in surveys. We continue to see the best risk-adjusted returns in high-quality Australian investment-grade bank FRNs, which also provide superior liquidity compared with lower-ranking assets. Our curve-steepening exposure in G3 rates is maintained via alternative risk premia total return swaps, strategies designed to perform well in an economic downturn or if yield curves continue to normalise as term premiums are priced in. The portfolio remains defensively positioned in line with the EFIT mandate.
